

EDUCATIONAL INTELLIGENCE LAYER

Epselon

AI is becoming every student's study partner. We make sure it still teaches them how to think.

A 2-MINUTE PITCH

THE QUESTION

How many of us have used ChatGPT to finish an assignment?

Used AI to finish work

Almost everyone in this room.

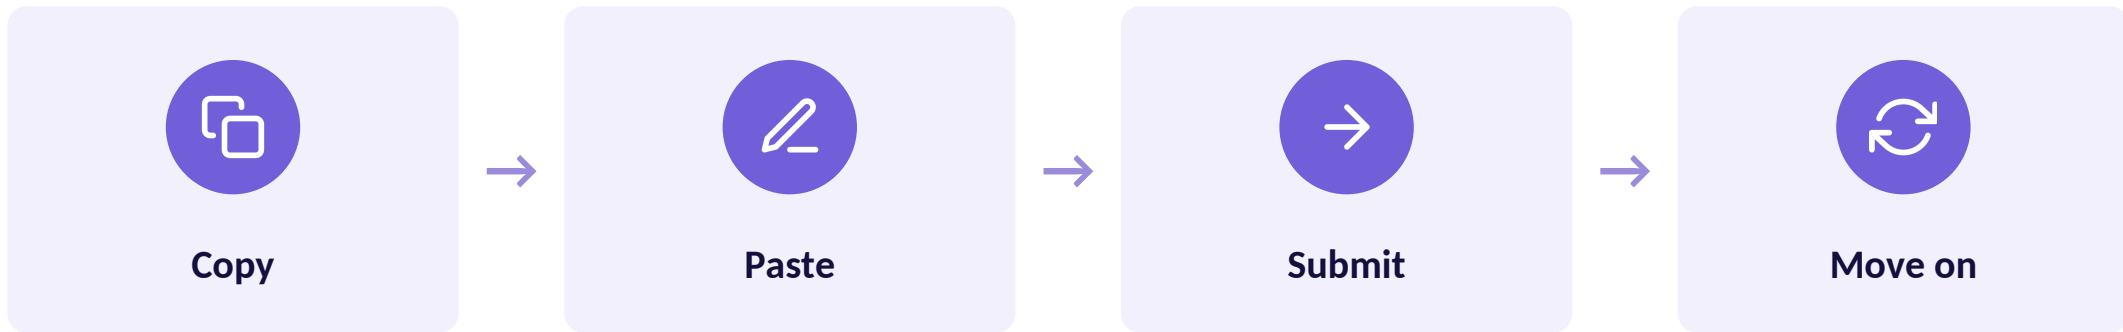

Understood what it gave us

That's the harder, bigger question — and it's the one that matters.

THE PROBLEM

AI is becoming the easiest way to stop thinking

Without truly learning.

We believe AI shouldn't replace thinking. *It should teach people how to think.*

THE SOLUTION

Meet Epselon

Not another AI chatbot. An Educational Intelligence Layer.

Every AI a student already loves — made to teach, not just answer.

HOW IT WORKS

From a simple prompt to a real lesson

STUDENT TYPES

"Explain Newton's Laws."

A plain, direct prompt — the kind that leads straight to a copy-paste answer.

EPSELON DELIVERS

- Enriched with the student's academic level & history
- Instructs the AI to teach, not just answer
- Structured explanations & guided reasoning
- A reflection prompt to check real understanding

Learning doesn't stop at the explanation

Interactive Flashcards

Auto-generated after every study session, so review happens without extra effort.

Focus Mode

An animated AI mentor that listens, speaks naturally, and evaluates understanding through real conversation.

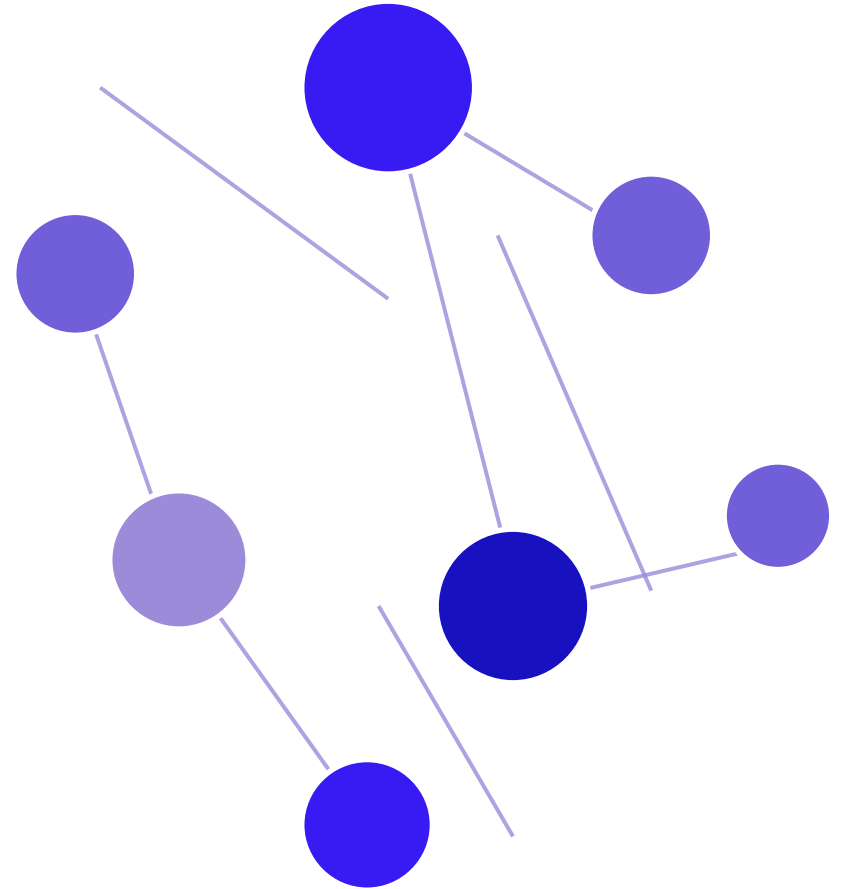

SEEING THE BIG PICTURE

Every interaction builds a Knowledge Graph

Students see how concepts connect over time — instead of memorizing isolated facts.

Connected, not isolated — knowledge that compounds.

WHAT MAKES US DIFFERENT

AI is not the product. Educational intelligence is.

Our proprietary learning pipeline decides, in real time:

When to enhance

Enrich the prompt with context before it ever reaches the model.

When to challenge

Encourage critical thinking instead of handing over the answer.

When to reinforce

Generate revision material to lock in what was just learned.

When to step back

Let everyday AI conversation flow naturally, unassisted.

OUR VISION

The future of education isn't building another AI.

It's building the intelligence layer that makes every AI a better teacher.

That's Epselon. *Thank you.*
